

# PACKET DISPENSING MACHINE NPD600

## SPECIFICATION

- The equipment allows for dispensing packets on insertion of notes.
- Manufactured in powder coated 2mm zinc sealed steel with 5mm armour proofing glass.
- Equipment is 230 / 240V operated, reducing to safe 12 Volt throughout the working modules of the note validator and packet dispensers.
- Weight 40kg (machine unloaded).
- Equipment can be mounted with dynobolts upon a wall, upon a bench or upon a plinth and locked.
- Individual security sealed bolting system.
- Cable entry can be through the side, rear or bottom, plus a preferred method of plugging directly into a power point over which the cabinet is mounted.
- Each of the parts are modular, allowing easy service and permitting continued operation of the remaining packet dispensers, if one or more are out of stock or out of service.
