VALIDATOR

TECHNICAL & SERVICE DETAILS

NOTE VALIDATOR

OPERATION

Notes of different denominations and values can be programmed into the validator.

These notes may be inserted in any orientation.

CONCEPT

- Notes can be invalidated by operation of select switches.
- Plug in black box with no exposed electronics, wires or mechanics.
- Various communication protocols satisfy varying applications.
- Supply voltage 12 Volts D.C. 24 V D.C. available on request.
- Connects via self aligning gold plated contacts - plug in the module - not the wiring.
- Alternate connector assemblies provided to cater for customers existing wiring harnesses.

COMMUNICATION

- Industry standard RS232.
- Proprietary I^{2}C multi-master serial bus.
- Other protocol on application.

PHYSICAL

- Small in size 194mm L x 92.5mm W x 62mm H.
- Very small front to back dimensions, suites small wall mounted machines.
- Standard physical size allows interchanging with other 40 series revenue handling modules.
- Motor drive module unplugs form the note validator carrier for easy clearing of jammed notes.
- Sculptured mouthpiece to allow easy note feeding.

EXPANSION

Allows for addition of a note stacker (under development).
