DUBLIN BUS AUTOMATIC FARE COLLECTION SYSTEM

SITUATION

Dublin, Republic of Ireland

SYSTEM

Ticket vending machines are used to take money away from the buses, and to reduce delays at bus stops.

Two machines are to be installed at Dublin airport, Heuston train station, and a number of city on street bus stops. Two machines at the airport also include a separate note to coin change giving machine. The city machines are coin operated but include change giving. All equipment is provided with an outer security shell for protection from vandals, except for the city centre locations.

Also included is a Management Information System for audit control and details of historic use of the system.
