## SOUTH YORKSHIRE SUPERTRAM AUTOMATIC FARE COLLECTION SYSTEM

### SITUATION

SHEFFIELD, ENGLAND

### SYSTEM

A ticketing system for a light rail, covering the city of Sheffield. Customers can purchase tickets from either retail outlets, or from on-platform ticket vending machines. These tickets are then inserted into a ticket validator also mounted on the platform.

The ticket vending machines print purchase price and machine location, and the ticket validators print time and date details, plus station location.

Since light rail is an open control system, control is provided by on-vehicle inspectors. Also provided is a Management Information System for audit control plus historic use details.
